Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the prior art made of record, claims 11-40 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a motion vector associated with a future block of a temporally next reference VOP, the future block spatially coincident with an intermediate block in a derived B-VOP; a temporally next reference VOP used by a decoder to: determine a first predicting block using a forward scaling of the derived motion vector; determine a second predicting block in the temporally next reference VOP using a backward scaling of the received derived motion vector; and predict the content of the intermediate block based on the first predicting block and the second predicting block.

It is noted that the closest prior art of record (Shen et al. US Patent no. 6,043,846) teaches a prediction determination method, however, Shen fails to particularly teach or suggest *"determine a first predicting block using a forward scaling of the derived motion vector; determine a second predicting block in the temporally next reference*

VOP using a backward scaling of the received derived motion vector; and predict the content of the intermediate block based on the first predicting block and the second predicting block." as specified in the claims.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
